Hello,

The Bonner County Historical Society would like to submit a comment on the update to the Bonner County comprehensive plan.

Our comment is in regards to page 20 of the draft updated on 07.05.2022, the Policies section under Special Areas or Sites:

As the Bonner County Historical Society, we feel it is important to retain the first policy statement that is currently slated for removal:

"A generalized map of the known pre-historic and historic sites should be developed so that future developments are aware of special areas of concern and are connected with the historical society and Native American tribes for appropriate preservation and protection."

As the amendments are currently proposed, the plan has only retained policy in place to protect scenic viewpoints, not historic or archaeological sites, with which our county is well endowed. These sites could be at significant risk if developers are not aware of their existence.

We also believe that the historical society and local tribes should remain close partners and resources for the County. BCHS would be happy to assist the County in furnishing the map of historic sites described above, as we believe it would be an invaluable resource for the residents of Bonner County.

Please let us know if we can provide any further information.

Respectfully,  
Hannah Combs  
Museum Administrator
