Hello,

I heard you are considering adding climate change to the comp plan. I say NO!  
Bonner County has no control over the climate. As example: look up. See the smoke? Where that smoke blows is out of our control.

Leave the climate to God and focus on the things you have control over such as limited, methodical development that serves the county as a whole, limits to rezoning individual parcels, and keeping the county rural.

A response to my email is appreciated.

Sincerely,  
Jennifer Cramer
