Alan & Staff,

I looked through the updated revision for the Comprehensive plan, dated 8/16/22. I also watched the you tube video of that meeting, and believe there are some mistakes in the revision as written.

In the Land Use component, the Policy is still shown. "Applications for land use actions shall be reviewed against the land use map and land use designations to ensure consistency with the Comprehensive Plan." That was struck at approx. the 2:17:20 mark.

In the Natural Resources component, second bullet point in Objectives, "mining lands" was added. In the Policies section, the last bullet point, "mining lands" was added as well. These took place at approx. 2:53:00 and 2:56:00 marks.

In the Property Rights component, Policies, my suggestion regarding "down-zoning" is now shown. However, I believe Chairman Songstad had different language, and was going to move it to the Land Use component... Also, Dave suggested some language, but it is no where in the revision.

I believe a correct updated revision is important for the public, as I, and others, may wish to make additional written comments based on updated proposed language.

Thank you,  
Matt Linscott
