Chair Marble moved to approve this project FILE CUP0013-23 for a retreat and private community facility, as amended finding that it is in accord with the general and specific objectives of the Bonner County Comprehensive Plan and Bonner County Revised Code as enumerated in the following **CONCLUSIONS OF LAW**:

### **Findings of Facts:**

---

1. The site is zoned Rural-5, where retreats and private community facilities are conditionally allowed.
2. The site has an individual well and septic system for their current residential use.
3. The site is approximately 20 acres in size.
4. The site is served by Northern Lights Inc. for their current residential use.
5. The site is in the mapped service area of Sagle (Selkirk) Fire District.
6. The site contains steep slopes of over 30% grade (USGS).
7. The site is located within SFHA Zone X (FEMA).
8. The site contains mapped wetlands (NWI, USFWS).
9. The applicant indicates that only the attendees of the proposed retreat and the private community facility will have access to the meals and overnight accommodations. The applicant is requesting a deviation to this standard with the request for using the retreat accommodations for the private community facility to house wedding guests.
10. The proposed accommodation for the retreat includes a lodge to accommodate a maximum of 20 guests for overnight stays.
11. The project proposes a single centrally located common area where kitchen and dining facilities may be located.
12. The site is accessed off Roop Road, a Bonner County owned and maintained 50-foot-wide, treated gravel right of way. While no comments were received from Sagle (Selkirk) Fire District stating any objections to the current standard of the road for emergency access, Bonner County Road and Bridge Department reviewed the project and provided comments indicating a need for possible upgrades of the driveway, requirement of a commercial encroachment permit to access the property and a signage at the end of the driveway based on the potential traffic that may be generated with the proposed use.

13. The site is currently served by an individual septic system and a well for the existing single-family home on the property. The applicant is proposing an addition of a well and another septic system to serve the proposed uses requested through this Conditional Use Permit. The proposed septic system is under construction at this time. At this time, no comments have been received from Panhandle Health District and the Sagle (Selkirk) Fire District discussing the adequacy of this potential addition of services on the property. Idaho Department of Water Resources provided a comment indicating a potential need of a public utility facility for a water system that may exceed certain limitations. Idaho Department of Environmental Quality has indicated that the water system will need to be permitted as a public drinking water system due to the potential to accommodate 25 or more people per day for 60 days. Additionally, their wastewater system may require to be permitted as a public wastewater facility. As proposed, neither of these systems meet the definitions of a Public Utility Facility, as defined in the Bonner County Revised Code.
14. The project as proposed shows that the retreat and all appurtenant structures will be accommodated on site to minimize effects on the surrounding properties and to not create any hazards for the adjoining properties.
15. The project is requesting a deviation to street setback requirements with the request to allow the applicant to locate a single 24"X36" sign at a distance of no less than 15 feet from the right-of-way. The deviation from the setbacks is not requested for the purpose of locating any other structures or development permitted through this Conditional Use Permit.
16. The project proposes no activity involving the use or storage of flammable or explosive materials on or off site.
17. The project proposes no activity involving emittance of harmful radioactivity or electrical disturbance.
18. The application for the proposal states, *"We use a decibel reader at our property line to ensure our DJ and noise level is within 60 decibels. The speakers will be adjusted to face west. We have also spoken with a noise abatement specialist with Acoustiblok. They have created a plan specifically for our property. Their products will be placed around DJ speakers, as well as a 6x30' Acoustifence on the west portion of the property line where speakers will be facing. In order to offset parking lot noise we will also be using a 6x10' Acoustifence where there is a path sound travels directly to our neighboring property. See attached information on Acoustiblok's technology. In addition, we ask guests to leave the parking area by 10:00pm. Our overnight guests will be staying in the center of our property to keep noise level within reason. Being centrally located, having the buildings and foliage as a buffer will provide adequate noise screening. Guests will be informed and be required to adhere to noise ordinances. Guests can have no DJ, PA or loud speakers at the lodging site."*
19. The application states that the hours of operation will be limited from 10:00 a.m. to 10:00 p.m.

- 20.The project is not proposing any activities that would seem to contribute to air or water pollution.
- 21.The private community facility is proposed to be operated on an area of ±5624 square feet.
- 22.Per the submitted site plan all the proposed structures on site show pedestrian or vehicular connections through the entire project.
- 23.Per the submitted site plan, the proposed location of the parking shows that it covers more than 50% of the lot frontage.
- 24.The project proposes locating "3 dry box storage units" on site.
- 25.The Bonner County Hearing Examiner held a public hearing on October 11, 2023 and recommended the Zoning Commission hear the file.
- 26.The private community facility will be served by KG & T Septic Services, using portable restrooms, and will require all attendees to provide their own water. The existing and the proposed wells and septic systems will not serve private community facility.
- 27.The proposed use of a wedding venue was evaluated by the Planning Director, per BCRC 12-331 and BCRC 12-339, and determined that the characteristics of the operation of the proposed use falls within the same classification as "churches, grange halls, public or private community facilities" as found in the Public Use Table in BCRC 12-335.
