Bonner County Planning,

Thank you for providing the opportunity to comment on the proposed project, CUP0001-24.

After a review of tax parcel No. RP049040000010A, showing ownership by James M & Kristin M Mills, has 2 domestic use claims filed (96-10240 & 96-12572). The application states that there will be a small vineyard on the property. The claims for domestic use include up to ½ acre of irrigation total. If you will be irrigating more than ½ an acre for the production of grapes to produce the wine, **you would be required to file for an Application for Permit** filed with IDWR. If the property owner has applied for a water right, they may update me with that information; at times originating documents are not profiled in the system immediately.

The Idaho Department of Water Resources (IDWR) requires that construction of a new well(s) must comply with drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules. If the proposed well is intended to be used for domestic purposes as defined in Idaho Code § 42-111 (for a household, no more than 13,000 gallons per day including up to a ½ acre of irrigation), the use will not require approval from IDWR. If the well will be used to irrigate more than ½ acre, use more than 13,000 gallons per day, or **be shared by more than one household**, the owner will need to file for and receive approval of an Application for Permit before a well drilling permit can be approved.

This rule applies to any well, not just new wells. The applicant can contact the Department with any questions.

Sincerely,

Tammy Alleman | Water Right Agent
