To: Bonner County Planning Department <planning@bonnercountyid.gov>

Good Morning,

Thank you for the opportunity to provide comment. DEQ has the following comments for the project listed above.

Drinking Water:

If a well is drilled, the water system will be considered a public drinking water system and will be required to meet DEQ rules and requirements. **We strongly encourage the applicant to meet with DEQ early the process to discuss the project and understand the timelines involved.**

Per the application, the water system serving this project would meet the definition of a public drinking water system (PWS) serving 25 people 60 days or more per year and must meet the requirements of a transient, non-community PWS under the Idaho Rules for Public Drinking Water Systems (Rules). If the CUP is approved the owner must meet the following requirements prior to developing and serving water to the public:

- The well location and construction must first be assessed and approved by DEQ. If it cannot be approved to meet Idaho Rules, another drinking water site and source must be approved.
- A facility plan and preliminary engineering report (PER) developed by an Idaho licensed professional engineer, which includes relevant requirements listed in IDAPA 58.01.18 Section 500, must be submitted to and approved by DEQ.
- Plans and specifications for the drinking water infrastructure to serve this project must be submitted to DEQ by an Idaho licensed professional engineer and approved by DEQ, and the well pump test must be performed and approved in
 - accordance with DEQ requirements.
 - Initial water quality monitoring must be performed.
 - Contact DEQ's Engineering Staff, Coeur d'Alene for further information (208) 769-1422.

Wastewater:

The application states future wastewater will likely be disposed of through a drainfield. DEQ may be involved in the review of the wastewater system at the request of Panhandle Health District (PHD). If the cumulative design flow from all wastewater generating facilities on the property exceeds 2,500 gallons per day (gpd), the wastewater system will be considered a public wastewater system and must meet the applicable rules defined in IDAPA 58.01.16 and IDAPA 58.01.03. If DEQ is requested to review the project, and the project exceeds 2,500 gpd, DEQ will require the applicant to submit a preliminary engineering report (PER) prepared by an Idaho-licensed professional engineer, a demonstration of technical, financial, and managerial capacity, engineered plans and specifications, and results from a nutrient-pathogen evaluation, prior to DEQ recommending approval to PHD.

Thank you,

Idaho Department of Environmental Quality
