Bonner County Road & Bridge Department is in support of this setback request. While we are usually opposed to setbacks of less than 10ft to the ROW on County maintained roads, this situation is unique in that the road only serves the Woods family and the rock & gravel pit at the end of the road where the scale is located. The Road & Bridge Department frequently uses this scale year-round when hauling the rock, gravel, chips, and/or sand from the pit and having the scale covered to prevent snow and ice build up would make using it in adverse weather safer and more convenient for our crews.

The scale is existing, and while it would ideally not be so close to the road, it's likely there for the foreseeable future and has not caused problems to date. The proposed structure would be a roof over the scale with columns but would not have walls adjacent to the ROW, which limits the risk of damage to the structure from snow and ice from passing snow plows which would normally be of concern to our department when enclosed walled-in structures are proposed close to the road.

Structures this close to the ROW do impact the ability to put utilities on this side of the ROW, but being so close to the end of the road reduces this impact. Power is already installed on the far side of the road.
