To: Bonner County Planning Department <planning@bonnercountyid.gov>

Thank you for the opportunity to provide comments for project VA0015-24. Development setbacks from stream banks and lake shorelines are an important tool for protecting water quality. Riparian vegetation provides natural filtration of stormwater runoff and provides numerous other benefits to promote healthy surface water ecology. DEQ recognizes that there are sometimes unique circumstances that may justify reduced setbacks. While an individual variance likely has a relatively small impact on water quality, the cumulative impact of development in close proximity to shorelines and stream banks is a significant threat to water quality. DEQ advises local government planning departments to maintain established setbacks whenever possible. Exceptions should be considered carefully by the local jurisdiction and used only when absolutely necessary to accommodate unique circumstances.

If you have any questions about the comments this project has received please contact:

- Katy Baker-Casile for engineering and wastewater.
- Anna Moody for drinking water.
- Shawn Sweetapple for air quality.
- Kevin Aardahl for remediation or RCRA.
- Robert Steed for surface water and setback requirements.

Thank you-

Idaho Department of Environmental Quality
2110 Ironwood Parkway, Coeur d'Alene, Idaho 83814
