TO: Bonner County Planning Department

GDV Commercial Properties, Inc - Applicant

Jeremy Grimm, Whiskey Rock Planning & Consulting - Representative

Good afternoon,

Idaho Department of Water Resources (IDWR) – Northern Regional Office offers the following comments:

- The application contemplates amending FLUM designation from Agriculture/Forest 10-20 acre to Rural Residential within Bonner County that would result in potential new individual ground water well(s) that do not have established water rights to serve residential parcel(s). For any ground water source uses which shall exceed water uses authorized in Idaho Code §42-111 following project completion: a new Application for Permit is required prior to the diversion of water, and the property owner needs to contact IDWR to discuss water right requirements.
- Any water uses that contemplate diversion of surface water source(s) (River, Stream, Spring) require an approved Water Permit prior to the diversion of water in accordance with Idaho Code §42-351.
- **IDWR has no conditional requirements to the proposal at this time.**

Thank you for the opportunity to comment,

Luke Bates – Sr Water Resource Agent

RE: File AM0020-25 Comprehensive Plan Map Amendment-Ag/Forest to Rural Residential

Dear Sir or Madam:

The above-mentioned area is not within the current boundaries of the Kootenai-Ponderay Sewer District. The District cannot guarantee services to an area outside of the District's boundaries. The District cannot guarantee services to areas even within the current boundaries if density levels are increased or changed outside of the Districts current planning for those areas.

It is noted that in the narrative the applicant is stating they are near the Kootenai-Ponderay Sewer District system. The property in question is not near the District's collection system. It is near the Land Application Site which has **no collection lines and is for the purposes of land application and storage lagoons not collection.**

Although the District is currently in the process of improvements to the current Wastewater Treatment Plant, it is for the purpose of improving treatment ability to meet IDEQ requirements not to increase capacity of the system. The District must consider growth within the current boundaries before considering any annexations of property outside of those boundaries. The District has not received requests for annexation into the boundaries for the property in question nor has the property owner/developer approached the District regarding potential expansion of the District's boundaries and whether expansion of the lines to that area is feasible.

Sincerely,

/s/ Colleen F. Johnson
