TO: Bonner County Planning Department

Byron & Kelly Ruen – Applicant(s)

Ruen-Yeager & Associates, Inc. – Representative (multiple POCs)

Good morning,

Idaho Department of Water Resources (IDWR) – Northern Regional Office offers the following comments:

- The application contemplates rezone from Rural-10 to Recreation and declares “approximately 250 subdivided lots & 2 RV parks” in the development area near Hope, Idaho. The Application proposes a new community water services as primary water supply with back-up secondary option to connect to active Kullyspell Estates Water system.
 - Kullyspell Estates Water System is associated with Active License(s) **96-8632** – Domestic use for 50 homes within Kullyspell Estates Subdivision and **96-8982** – Municipal water uses for Kullyspell Estates HOA public water system.
 - The Municipal water Right 96-8982 may contemplate expanding their water system service area but can’t enlarge the 59.4 acre-feet annual volume authorized under the License; an Application for Transfer *may* be required prior to extending the municipal system service area.
 - The Domestic water Right 96-8632 was licensed specific to 50 homes within a named subdivision and this Water Right will not be eligible to provide water to additional “new” development.
- Considering the two active water rights owned by the neighboring Kullyspell Estates Subdivision are dedicated to existing water uses, new application for permit(s) will be necessary to facilitate development of future water uses for the proposed project.

- Any water use(s) from a proposed or an existing ground water well(s) that do not have established water rights, which shall exceed water uses authorized in Idaho Code §42-111 following project completion: **an Application for Permit submission and subsequent Water Permit approval is required prior to the diversion of water for beneficial uses which exceed exempt status use(s)**, and the property owner needs to contact IDWR to discuss water right requirements.
- Any water use(s) from a proposed surface water source (lakes, streams/streams, spring) requires an approved Water Permit prior to the diversion of water for beneficial use.

Based on current Idaho Code §42-111, the proposed future development intended to serve up to 250 lots and RV park(s) with ground water or surface water shall **require an approved water right permit prior to the applicant securing a well construction permit for a ground water source.**

The applicant or their representative may contact IDWR toward submitting an application for permit.

Bonner County Planning Dept,

Good morning. Following IDWR initial comments I communicated with Mr. Darius Ruen, P.E. Ruen-Yeager & Associates, Inc. by phone; the conversation centered around my miss-interpretation of a portion of the proposed zone change application regarding 250 subdivided lots & 2 RV parks.

In my prior comment I inferred these lots and RV parks were contemplated development by the applicant and that is an incorrect statement. IDWR revises this portion of prior comment to reflect that the area near the zone change includes approximately 250 subdivided lots & 2 RV parks which may benefit from added sewer system development and that in the future additional water resources may be contemplated to assist in serving some of these uses but this would fall under separate county application and permitting processes.

Thank you for considering IDWR (my) revision to prior comments. Ultimately, **IDWR does not have any jurisdictional requirements at this stage of the project development.**

Best regards,
