The Road & Bridge Department has the following comment:

It's not clear from the proposed plat what the right-of-way width for Clagstone Rd is at the corner where this parcel is adjacent to the road. The label of "Variable width" and referencing the I survey. If it is less than 80ft wide, additional dedication of ROW is needed. It appears from the County's GIS map that the parent parcel extends out to the centerline of the road, but here o perhaps a ROW dedication is needed if the boundary is being changed to align with the ROW easement.

Steven Binnall – GO Land Surveying, PLLC - Representative

Good morning,

The proposed project declares individual private ground water well sources will serve each parcel. Idaho's water law has provisions which authorize parcel owners to construct private wells without obtaining recorded water rights as described in the first bullet comment below, but IDWR recommends all parcel owners contact IDWR to discuss the merits of recording water use and developing recorded water rights to help protect their real estate property in the future.

Idaho Department of Water Resources (IDWR) – Northern Regional Office offers the following comments:

- Any water uses from an existing ground water well(s) that do not have established water rights, which shall exceed water uses authorized in Idaho Code §42-111 following project completion: a new Application for Permit is required prior to the diversion of water, and the property owner needs to contact IDWR to discuss water right requirements.
- Any water uses that contemplate diversion of surface water source(s) (River, Stream, Spring) require an approved Water Permit prior to the diversion of water in accordance with Idaho Code §42-351. **The property owner(s) are required to contact IDWR to discuss water right requirements for the storage pond located on the parcel(s).** IDWR doesn't show any existing recorded water rights on file for the impoundment of water related to the pond.

Thank you for the opportunity to comment,

Luke Bates – Sr Water Resource Agent
