## **F. Standards Review and Staff Analysis:**

---

### **BCRC 12-231 Purpose:**

The purpose of this subchapter is to provide a mechanism by which the county may grant relief from the strict application of the provisions of this title where proposals conform to the standards set forth in this subchapter.

### **BCRC 12-232 General provisions:**

A variance is a modification of the bulk and placement requirements of this title as to lot or parcel size, lot coverage, width, depth, front yard, side yard, rear yard, setbacks, parking space size, height of buildings, or other provisions of this title affecting the size or shape of a structure or the placement of a structure upon a lot or parcel, or the size of the lot or parcel.

### **BCRC 12-234 Variances, standards for review of applications:**

The staff, Zoning Commission, hearing examiner and/or Board shall review the particular facts and circumstances of each proposal submitted. To grant a variance, the hearing examiner or the Governing Body must find adequate evidence showing that:

- (a) Conditions apply to the property that do not apply generally to other properties in the same zone or vicinity, which conditions are a result of lot size, shape, topography, or other circumstances over which the applicant has no control.**

*Applicant: " The subject property is transected by Bay Drive, effectively separating it into 2 parcels. The applicant site is the only property on Bay Drive that the road runs separating it into 2 parcels. The applicant's site is the only property on Bay Drive*

*that the road runs through all other property boundaries end at Bay Drive. There is an existing home on the property that does not have a garage, residents have to park on the opposite side of Bay Drive walk across the road and down a full story outside to access the current entrance to the residence. Steep topography between the residence and Bay Drive limits the options for creatin an attached garage. Current access to the front entrance of the house is down stone steps a full story below Bay Drive. This is difficult and hazardous for aging occupants, particularly in the winter and during bad weather. It is worth noting that at least 2 garages in the vicinity on Bay Drive are within the R.O.W., on tis 2416-8 feet from the road edge."*

**Staff:**

**Lot Size:**

This parcel is ± 4.49 acres. The lot is spilt by Bay Drive. The southern portion is ±3.57 acres and the northern portion is ±0.76 acres.

**Shape:**

- The southern side of the lot is rectangular in shape. The northern portion is rectangular in shape however this portion of the lot is narrower. The lot is currently split by an easement that intersects the lot. Bay Drive was platted in 1952 as part of Bottle Bay Tracts with a 40' right of way, however the right-of-way ends at the eastern property line of this lot and an easement begins, per Instrument # 42186.

**Topography:**

- The lot has mapped slopes of 0-30% grade and above. The northern portion of the lot that is split by Bay Road has mapped slopes of 0-15%, which is approximately 0.72 acres of the 4.49 acres.

**Other Circumstances:**

- The applicants did not establish the area where the existing easement is constructed.

**(b) Special conditions and circumstances do not result from the actions of the applicant.**

*Applicant: "The applicant purchased the home in its current state and location. Bay Drive is as it has existing since the initial plat of the subdivision was created. The conditions requiring the variance request were not crated or altered by the applicant, including the entry situation and stone stairs to the front door."*

- **Staff:** The single-family dwelling was constructed under an approved Building Location Permit (BLP2003-0718) in 2003. The dwelling was built on the portion of the lot that is separated by Bay Drive to the north. Based on the 2003 site plan, the dwelling was constructed to meet the exact setback of 25'. The applicants had no control over the location of where the dwelling was constructed.

**(c) The granting of the variance is not in conflict with the public interest in that it will not be detrimental to the public health, safety, or welfare, or**

**materially injurious to properties or improvements in the vicinity of the subject parcel or lot.**

*Applicant: "If the variance is granted, it will allow the applicants to park inside or in a driveway adjacent to the residence rather than across the street in an open parking area. By not having to cross Bay Drive to access the residence, public safety for the applicant's family and neighbors using Bay Drive will be improved. No adjacent properties will be adversely affected and in fact it will enhance the character and quality of the neighborhood by removing parked cars from the public view."*

**Staff:** Bonner County Road & Bridge Department commented "The Bonner County Road & Bridge Department has no objections to the proposed street setback variance. Bay Drive at this location is private and is beyond the end of the public road right of way and is therefore outside our area of interest." No other agency has commented on how this request could be detrimental to the public health, safety or welfare, or materially injurious to properties or improvements in vicinity of the subject lot.

**G. Stormwater plan**

A stormwater management plan is required pursuant to BCRC 12-720.2(E). New building construction or development which occurs on or within three hundred feet (300') of a slope with fifteen percent (15%) or greater incline as determined from the applicable seven and one-half (7.5) minute quadrangle map published by the United States geological survey or by actual survey, and which is subject to the provisions of title 11 of this code.

**H. Shoreline:**

BCRC 12-711 Shoreline Setbacks:

A. The following shoreline setbacks shall apply in all zoning districts:

1. For lakes, sloughs, ponds or other similar basins, or the Clark Fork or Pend Oreille rivers, or intermittent streams as shown on the national hydrography dataset (NHD), no structure shall be located closer than forty feet (40'), measured horizontally from the "shoreline", as defined in Section [12-819](#) of this title.

2. For rivers, streams, creeks or other similar flowing bodies of water, excluding the water bodies identified in subsection A1 of this section, no structure shall be located closer than seventy five feet (75'), measured horizontally from the applicable natural or ordinary water mark of any stream as shown on the NHD published by the United States geological survey, or by actual land survey or field inspection.

**I. Conceptual Engineering Plan:**

BCRC 12-761: When land disturbing activity is proposed in areas where the natural slope equals or exceeds thirty percent (30%), the Planning Director, Hearing Examiner, board or Zoning Commission may require a conceptual engineering plan as part of a subdivision, conditional use permit or variance application. The plan shall be developed by an Idaho licensed civil engineer, and shall depict proposed building sites, road and driveway grades, profiles and cross sections, and the slope and location of cuts and fills. The purpose of this plan is to demonstrate the feasibility of the proposed subdivision design and to illustrate the nature and extent of earthwork required for site preparation and construction.

## LAND USE DECISION-MAKING WORKSHEET VARIANCE

*Idaho Code §67-6535 (2): The approval or denial of any application required or authorized pursuant to this chapter shall be in writing and accompanied by a reasoned statement that explains the criteria and standards considered relevant, states the relevant contested facts relied upon, and explains the rationale for the decision based on the applicable provisions of the comprehensive plan, relevant ordinance and statutory provisions, pertinent constitutional principles and factual information contained in the record.*

### STANDARDS FOR VARIANCE REVIEW:

Prior to approving a variance, the governing body shall review the particular facts and circumstances of each proposed variance in terms of the following standards and shall find adequate evidence showing that such use at the proposed location.

<b>Idaho Code §67-6516</b>		Each governing board shall provide, as part of the zoning ordinance, for the processing of applications for variance permits. A variance is a modification of the bulk and placement requirements of the ordinance as to lot size, lot coverage, width, depth, front yard, side yard, rear yard, setbacks, parking space, height of buildings, or other ordinance provision affecting the size or shape of a structure or the placement of the structure upon lots, or the size of lots. A variance shall not be considered a right or special privilege, but may be granted to an applicant only upon a showing of undue hardship because of characteristics of the site and that the variance is not in conflict with the public interest.
