DEQ Comments <deqcomments@deq.idaho.gov>

To: Bonner County Planning Department <planning@bonnercountyid.gov>

Thank you for the opportunity to comment on the requested impervious surface coverage variance V0030-25. Limiting impervious surface coverage in the areas near surface water bodies helps protect water quality by limiting the amount of direct stormwater runoff into streams and lakes that can carry sediment and other contaminants into surface water. While an individual variance may have minimal localized impacts, the cumulative effects of multiple variances that result in increased impervious surfaces near surface water within the watershed can be expected to have a negative impact on water quality over time. DEQ recommends maintaining the limits in established codes wherever possible, and considering individual variances carefully for very unique situations.

If you have any questions about the comments this project has received please contact:

- Katy Baker-Casile for engineering and wastewater.
- Anna Moody for drinking water.
- Shawn Sweetapple for air quality.
- Kevin Aardahl for remediation or RCRA.
- Robert Steed for surface water and setback requirements.

Thank you-
