F. BCRC 12-232, General Provisions

In accordance with BCRC 12-232, the applicant is seeking a 40% variance to street setbacks.

G. BCRC 12-233, Application, contents

In accordance with BCRC 12-233, the applicant submitted all the required documents and the application was deemed complete on November 24, 2025.

H. BCRC 12-234, Variances, standards for review of applications

BCRC 12-234 specifies that "The staff, Zoning Commission, hearing examiner and/or Board shall review the particular facts and circumstances of each proposal submitted. To grant a variance, the hearing examiner or the Governing Body must find adequate evidence showing that:"

- (a) **Conditions apply to the property that do not apply generally to other properties in the same zone or vicinity, which conditions are a result of lot size, shape, topography, or other circumstances over which the applicant has no control.**

Applicant: "This lot is smaller than the typical Suburban zone 1 acre lot, combined with a flanking street and overhead power lines at the north lot line. The garage was undersized when built in 1989 and can no longer accommodate a typical pickup or boat. A feature tree is centered in the back yard where the potential garage would be located per standard 25'-0" flanking street setback. The 15'-0" setback we're requesting would still allow for the applicant's vehicle to be parked in front of the garage and be fully out of the roadway (Greenwood Ave). There would be 21'-9" between face of garage and the edge of the road. The western neighbor has a detached garage within 24" of north property line, creating an implied detached structure setback. The applicants are proposing to set their structure further back than this, respecting the intention of a flanking street setback as much as possible."

Staff: The subject property does not contain any mapped slopes, wetlands or bodies of water, and is within SFHA (Special Flood Hazard Area) Zone X, which does not require floodplain development permitting. The lot is approximately 0.354-acres in size and rectangular in shape. While the lot size is small, it is conforming with BCRC 12-412 Table 4-2 which allows Suburban zoned lots to get as small as 10,000 when all urban services are available.

The subject property has two street setbacks, one along the Eastern property line for Harbor View Drive, and the other along the Northern property line for Greenwood Ave. These two 25ft setbacks can make development on a lot this size challenging.

(b) Special conditions and circumstances do not result from the actions of the applicant.

Applicant: "The applicants have done nothing to their lot to create this challenge, it was like this when they bought it."

Staff: Per Warranty Deed, Instrument #964761, the current owner acquired the subject property in September of 2020. The subject property was originally platted via the plat of Lakeside Place, Book 1, page 79, in 1908. There is no evidence that the landowner has changed the lots size, shape or topography of the lot since obtaining it.

(c) The granting of the variance is not in conflict with the public interest in that it will not be detrimental to the public health, safety, or welfare, or materially injurious to properties or improvements in the vicinity of the subject parcel or lot.

Applicant: "The requested setback would place the new garage further back from Greenwood than the west neighbor's detached garage. The use (garage and storage) is in keeping with the usage of the west neighbor as well as the lot to the north. Which is also a detached garage/shop. The proposed setback respects the existing overhead power line setback and it is not obstructing pedestrians walking on Greenwood. The garage use is consistent with usages immediately next to it on the west property as well as across the street to the north. The southern neighbor is protected by a tree line from any additional building views, especially if the applicant's are granted this variance and are allowed to keep the feature tree between the proposed garage and southern neighbor."

Staff: Bonner County Road & Bridge submitted a comment stating they are neutral to the setback variance as the requested variance will not have any significant impacts to maintenance operations or utility installation. (Full Road & Bridge comment can be found in the attached Appendix B.)

No other comments from the public or any public agency or taxing district were received that stated that the proposed project would be detrimental to the public health, safety, or welfare or be materially injurious to the surrounding properties or improvements within the vicinity of this project.

I. BCRC 12-412, Density and Dimensional Standards; Suburban, Commercial, Industrial, Rural Service Center, Recreation and Alpine Village Zones

Per BCRC 12-412 Table 4-2, the street setback in the Suburban zone is 25'. This request proposes a deviation from this standard to allow for a 15' setback.

BCRC 12-7.2, et seq., Grading/erosion/stormwater management

Stormwater Management concerns will be addressed during the Building Location Permit phase in accordance with BCRC 12-720. No further review is required for this project.

Conclusion 2

Special conditions and circumstances **did not** result from the actions of the applicant.

Conclusion 3

The granting of the variance **is not** in conflict with the public interest in that it **will/will not** be detrimental to the public health, safety, or welfare, or materially injurious to properties or improvements in the vicinity of the subject parcel or lot. (Ord. 559, 1-4-2017)

This is based upon the evidence submitted up to the time the Staff Report was prepared and testimony received at this hearing. I further move to adopt the reasoned statement as discussed in deliberation at this hearing and the analysis as set forth in the Staff Report (or as amended during this hearing) and direct planning staff to draft the reasoned statement to reflect this motion as set forth in Idaho Code section 67-6535, have the Chair sign, and transmit to all interested parties. Conclusion 2

Special conditions and circumstances **do/do not** result from the actions of the applicant.

Conclusion 3

The granting of the variance **is/is not** in conflict with the public interest in that it **will/will not** be detrimental to the public health, safety, or welfare, or materially injurious to properties or improvements in the vicinity of the subject parcel or lot. (Ord. 559, 1-4-2017) This decision is based upon the evidence submitted up to the time the Staff Report was prepared, and testimony received at this hearing. This action does not result in a taking of private property. The action that could be taken, if any, to obtain the variance is to:

- 1) File a new application with the Planning Department and meet the standards required by Bonner County Revised Code; or
- 2) Appeal the decision to the County Commissioners.

Conditions of approval:

A-1 Only the development highlighted on the site plan has been reviewed for variance standards. All other development shown must comply with Bonner County Revised Code.

The Road & Bridge Department is neutral regarding the proposed 15ft street setback variance request. The road is County maintained, but the proposed setback is far enough back that it will not have any significant impacts to our maintenance operations or to the future installation and maintenance of utilities within the public right of way.
