REF: VA0029-25

TO: Janna Brown, Administrative Assistant III

Good morning,

The proposed Application specifies that water is served by an existing sand point well in their request for setback consideration from the high-water line to maintain the same well and install a constructed cover over the well.

Idaho Department of Water Resources (IDWR) – Northern Regional Office **doesn't have any conditions of approval requirements for the proposed project** as the well is pre-existing but offers the following information as education for the property owners:

- If current or future water use from an existing ground water well exceeds water uses authorized in Idaho Code §42-111 following project completion, a new Application for Permit is required, and the property owner(s) need to contact IDWR to discuss water right requirements.
- Existing sand point well construction shall comply with Idaho Code §42-235 and IDAPA 37.03.09 – Well Construction Standards Rules.
 - Current Well Construction Standards Rule(s) for hand dug wells equal to or less than 18 feet in depth below ground surface aren't within IDWR's jurisdiction.
 - **If the hand dug sand point well is deeper than 18-ft, the parcel owner is required to contact IDWR to evaluate whether well construction rules are satisfied.**

Thank you for the opportunity to comment,

Bates, Luke
