TO: Bonner County Planning Department

Emily Aune – Representative at North Root Architecture

Good morning,

The proposed Application specifies that an existing well currently used by the golf course will not be service connected, and a proposed well is contemplated to provide ground water for the project's development.

Idaho Department of Water Resources (IDWR) – Northern Regional Office **doesn't have any conditions of approval requirements for the proposed project** but offers the following information as education for the property owners:

- If future water use from an existing ground water well exceeds water uses authorized in Idaho Code §42-111 following project completion, a new Application for Permit is required, and the property owner(s) need to contact IDWR to discuss water right requirements.
 - Applicant(s) or their Representatives may review Idaho Code using IDWR's public website at <https://idwr.idaho.gov/domestic-exemption/>
 - It is reasonable that the project as described by narrative conforms to Idaho Code §42-111 sub para (1)(a)(ii) which states "The use of [ground water] for any other purpose, if the total use does not exceed a diversion volume of two and eight-tenths (2.8) acre feet per year."
- IDWR understands that the use of ground water may conform to the Domestic Exemption, but I recommend the Applicant reach out to IDWR to discuss the merits of filing for recorded water rights.
- If Idaho Department of Environmental Quality requires the proposed development to adhere to Public Water System requirements, IDWR highly recommends a water right filing be submitted for the proposed project.

Thank you for the opportunity to comment,

Luke Bates – Sr Water Resource Agent

ITD has been in contact with PRAR about this subdivision. ITD has no objection to this subdivision with the provision that the PRAR applies for a permit application within the 360' spacing requirements.
