To: Milton Ollerton <milton.ollerton@bonnercountyid.gov>

Milton,

Road & Bridge has no objections to the proposed setback variance. Although Lake St is County maintained, the road is a dead end and snow plow and other equipment speeds are slower as they prepare to stop and turn around just past the property. As such, equipment is unlikely to cause damage to a structure which is set back 17ft from the property line while conducting maintenance operations such as snow plowing.
