PROPERTY OWNER AGREEMENT

The Selkirk Cooperative Weed Management Area members, which include several agencies, such as Bonner County, U.S. Forest Service, Idaho Department of Lands, and other organizations, need your support in controlling noxious weeds on your land. Grant funds for this project are available and your approval is requested.

Please sign this form to provide us documentation that we may cross your land and treat the targeted noxious weeds as needed. It is our intention to ensure the actual property owner has been notified and is in favor of the activity proposed. A copy of this agreement is also necessary to be passed along to renters of those owners who may reside out of the area.

The weed management area members who have organized this effort also request the landowner make plans for future treatment(s) of the target noxious weeds. It is of high importance that the noxious weed(s) listed below are prevented from being elevated out of EDRR status (early detection, rapid response) to avoid high costs of control across more of the landscape. The cost of spot treatments for a few years is far less than widespread treatments. Idaho law requires the landowner to be responsible for all costs of noxious weed control and this is an opportunity for you to receive compliance assistance, reducing those costs.

This agreement only applies to those noxious weeds identified on this form as the targeted noxious weeds. Please return this form within 7 days to the above address or call or email our office if you need assistance or more time to respond.

TARGET NOXIOUS WEED(S):

Herbicide application records will be available on request.
